Subject: RE: FOR REVIEW: Interview request from PBS NewsHour

After some follow up with the reporter. She's filing her story for the science section tomorrow COB.

Hi Molly,

Thank you for the call. Here are my questions. I understand if Dr. Thayer cannot answer them all.

- In 2011, the National Academy of Sciences (NAS) evaluated a 2010 IRIS report on formaldehyde, citing several problems. How have those problems been addressed in the new formaldehyde report?
- There is evidence the new report has been ready since before January 2018, yet no draft has been released. What is the delay?
- Are the findings in the new report different from the 2010 report?
- Is there a scientific consensus on a causal link between formaldehyde exposure and leukemia? What about other cancers?
- Is the average person exposed to harmful levels of formaldehyde? What about those who work with formaldehyde for chemical synthesis, embalming, etc...?
- Has IRIS or the EPA reached out to the NAS for a review of the new report?
- NAS recently reported improvements in the IRIS program. Which NAS recommendations have been most successful, and which recommendations are still being worked on?
- The American Chemistry Council is critical of the 2010 formaldehyde report. What does IRIS think about these criticisms?

Best,
Amanda

Carolyn,

How do we want to handle this?

Subject: Interview request from PBS NewsHour

Dear Dr. Thayer,

I am a science journalist at PBS NewsHour pursuing a story about the upcoming EPA IRIS report on formaldehyde.

I spoke with Dr. Jonathan Samet, chair of the NAS committee that evaluated the 2011 IRIS report on formaldehyde as well as NAS reports on improvements within IRIS. He recommended that I speak with you.

Do you have time for a ~15 minute interview today or tomorrow?

Thank you in advance.

Best regards,
Amanda
